

**Experienced, Successful Supreme Council of Health approved**

Laser Innovations International Limited directed by Ms Nita Tripp in association with Dr. Ayad Al-Shakarchi Medical Center, Doha, are proud to announce the first Laser Training Programmes which are approved by the Supreme Council of Health in Qatar.

**Ms Nita Tripp Training Director**

at Laser Innovations International Limited in UK, specializes in the training of Low Level Laser Therapy (LLLT) and she has over 12 years of experience in this field.

Ms Tripp has trained many medical professionals and entrepreneurs in hospitals and clinics in Canada, USA, South Africa, Turkey, Thailand, Indonesia, Malaysia and Europe.

Dr Ayad Al Shakarchi Consultant Surgeon has pioneered the quit smoking programme in The Gulf and other Arab Countries. Since 2007, he has treated more than 1000 patients. With many clients succeeding in quitting smoking over the last four years, Dr. Al-Shakarchi has achieved an impressive success rate of over 80%.

Together we will provide the experience and information to equip doctors with the knowledge necessary to successfully use laser therapy in their clinic or hospital facility.

**Low Level Laser Therapy**

All low level laser treatment are painless, non-invasive and entirely safe.

The smoking cessation program involves the patient receiving the laser therapy treatment over three consecutive sessions with comprehensive consultation. This technology works with a cold, soft laser beam applied to a specific points of the body, to stimulate the production of endorphins that help relieve the cravings and symptoms as well as helping stress reduction and lung detoxification.

The weight loss program is designed to fit in with your patients' lifestyle and consist of four sessions each of 30 minutes at weekly intervals. This assist patients in losing weight by managing their expectations, improving the overall sense of well being and enabling them to take control over their changing lifestyle.

The Stress Management Program: The laser treatments within this program help to promote a feeling of well-being, resulting in a reduction in anxiety levels and mood swings which can result in an improvement in the patient's sleeping patterns.

Clinic application: for doctors who purchase the Cluster Probe there will be an additional element within their training, using the cluster probe which contains several diodes emitting low level Laser at the same time. This will be absorbed by chromospheres in the cells, triggering the biochemical modulator effect. This will enhance tissue repair by increase vasodilatation and pain relief by stimulation of endorphin release that is why it is used to treat many dermatological (acne and eczema) conditions and it is used in rheumatology to reduce joint pain. Also used in surgical cases to enhance wounds healing.

**Course Programme**

**DAY ONE - (Thursday)**

- 9.00 am Reception and Introduction
- 9.30 am What is Laser and How does it Work?  
- Laser Principles and Safe Use
- 10.30 am Smoking Cessation  
- Research  
- Effects of Smoking  
- Benefits of Stopping Smoking
- 1.00 pm Lunch

- 9.00 am Refresher
- 9.30 am Laser Parameters  
- Preparation and Techniques  
- Conditions and Treatments
- 11.00 am - 1.00 pm Lunch and Prayer Break
- 1.00 pm Live Treatment Demonstration  
- Trigger points  
- Practical tips/Discussion
- 3.00 pm - 3.30 pm Test and Certificate presentation

**Part Two**

- 4.00pm - 7.00 pm Training for Cluster Probe  
- Dermatological diseases, Surgical and Rheumatology cases

**Training Course Content**

The training course for Smoking Cessation, Stress Management and Weight control will be conducted over one and a half days.

Course participants (Doctors) will be instructed in the principles and practicalities of laser application, the physical treatment of clients for smoking cessation therapy and the psychological aspects of smoking addiction.

Each trainee will receive a 3B Laser system supplied by one of the world's leading low intensity laser manufactures. Each system will comprise a base unit plus an 820nm single probe, a CO Monitor, an acupuncture tip, a carry case and one year's warranty. Practical demonstrations and hands-on equipment sessions together with safe-use instruction will be included.

An additional half day (at the second day) training will be provided for participants who purchase the multi-wavelength cluster probe enabling dermatological treatments, pain management treatments and enhance wound healing.

Training will also entitle attendees to one year's membership of the UK Institute for Therapeutic Laser (see [www.ukitf.com](http://www.ukitf.com)).
